

IF RENEWABLE FUEL MOVES IT, OUR DATA PROVES IT

AGCO POWER CO₂ CALCULATOR CONCEPT
- identify fuel type and verify
carbon footprint in real-time

REPLACE ESTIMATES WITH DATA

Detect HVO,
fossil diesel
or blends
being used

Calculate the
exact carbon
footprint per
job, field, or
farm

Visualize
verified data
across the
entire food
value chain

TRANSPARENCY IS THE NEW STANDARD

-  Proven sustainability brings a decisive advantage in the food industry.
-  Up to 90% reduction in operational emissions with HVO.
-  Automated reporting eliminates human error and admin burden.

A FULLY INTEGRATED ECOSYSTEM

Seamlessly connect engine sensor technology, cloud services, and end-user interfaces.

Meet tightening ESG requirements and unlock sustainability incentives in the EU.

POWER TO TRANSFORM

The concept is undergoing
field testing – let's define the
future together!
